26-30".....	\$49 per unit
31-37".....	\$65 per unit
38"+ (including projection).....	\$85 per unit

WHY RECYCLE

Electronics are not toxic until they are exposed to:

- **Soil** (*Poisonous to the food we grow*)
- **Water** (*Poisonous to the water we drink*)
- **Fire** (*Poisonous to the air we breathe*)

Electronic waste contains:

- Lead • Mercury • Copper • Cadmium • Beryllium
- And many other hazardous components

If not properly recycled, these hazardous toxins can contribute to birth defects, cancer, kidney failure, learning disabilities, intellectual disability, and behavioral problems when not disposed of properly.

Many states have banned electronics from landfills. Until Michigan makes this law, we hope you make the right decision to recycle.

Thank you for choosing to recycle!
